Crop Detection

SATELLITE ESTIMATE	LPIS DECLARATION (FARMER)
■ Maize Confidence: 100% ■ High	■ Barley - Spring Status: ■ Satellite estimate differs

This difference is presented as evidence for review, not as a determination that the declaration is incorrect.

1.6 ha FIELD AREA	Silking GROWTH STAGE (4/7)	0.80 NDVI (VEGETATION)	5–15 Oct HARVEST WINDOW

Methodology

This crop prediction is generated using a CatBoost machine learning model trained on 61,566 Irish tillage parcels from the LPIS 2024 dataset, using HLS (Harmonized Landsat Sentinel-2) satellite imagery — NDVI, EVI, NDWI, NDRE and NDII vegetation indices — across four growing seasons (2022–2025). The model achieves 77.05% balanced accuracy nationally on held-out validation data.
